Career Summary

As a Full Stack Developer, I bring extensive experience in building robust and scalable web applications from end to end. I have developed dynamic APIs and backend services using PHP, Java, Spring Boot, and Node.js, while also delivering responsive and user-friendly interfaces with Vue.js, React.js, AngularJS, and HTML/CSS. My expertise includes containerized deployments on AWS with Kubernetes, automation using Python and Bash, and database design across SQL and NoSQL platforms. I have successfully led and contributed to projects across various domains, including finance, logistics, health, government domains and education, ensuring high performance and maintainability throughout the development lifecycle.
